

Best Toners

Anyone who takes skin and scalp care seriously knows that – post wash – it all starts with a toner. Essentially a water based liquid (sometimes a gel), a toner hydrates the skin and gently exfoliates dead cells in preparation for your next stage of treatment. Think of it as a pre-treatment you don't want to skip. Before you start shopping around, consider whether an astringent might be a better option for you than a toner. Astringents have the same function but are better at removing excess oil. If it's a toner you're after, here are your best options

Thayer's is a fantastic product that is in everyone's good books because of one ingredient that even pricier brands tend to include, but that Thayer's leave out: alcohol. Thayer's own star ingredient – great at cleaning and known to treat a variety of skin condition – is organic, non-distilled witch hazel. This toner also contains aloe vera and rose water, doing a wonderful job of toning your skin effectively and naturally, whilst balancing pH levels.

[The Body Shop Tea Tree Skin Clearing Mattifying Toner](#)

Made with tea tree oil, this 100% vegan toner is the kind of environmentally sound and healthy product Body Shop faithful's have come to depend on from the company over the years. Using fair trade ingredients from Kenya, this toner will remove residual makeup and impurities, and where you would usually have to turn to astringent, it's also good for oily skin too.
